

Embryo Transfer Services & Sales

ET Services:

Traditional Flushing

In Vitro Embryo Production (with Trans Ova)

Embryo Freezing

Transfer Frozen or Fresh Embryos

Evaluate and Transfer Fresh IVF Embryos

Embryos From Trans Ova Genetics

We are selling many types of embryos for Trans Ova Genetics. These are all frozen IVF embryos. Available for purchase:

- ◆ Purebred Holstein Embryos (\$160-\$200) - all embryos over 800 NM\$ on parent average
- ◆ Purebred Jersey Embryos (\$160-\$200) - all embryos over 500 NM\$ on parent average
- ◆ Holstein/Jersey F1-Cross Embryos (\$120-\$150)
- ◆ Angus Embryos (\$35) - great option for Jersey herds

Embryos From Terra Linda Dairy

We are also selling embryos for Terra Linda Dairy. Terra Linda is known to have some of the best Holstein genetics of any herd in the country and recently produced the #10 highest heifer for NM\$ in the Holstein breed.

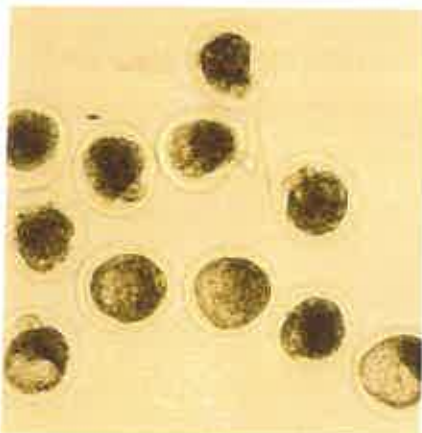

- ◆ Purebred Holstein Embryos (\$175-\$225) - All donors are over 800 NM\$ and all embryos over 850 NM\$ on parent average
- ◆ Option to produce fresh IVF embryos for better conception rates

Why embryos?

- ◆ Superior genetic advancement—propagate the best female genetics in addition to male side
- ◆ Additional return on genomic information
- ◆ Additional value for day-old beef (angus embryos)

Expected Results

- Frozen IVF embryos - 40-55% conception
- Fresh IVF embryos - 45-60% conception
- Flush embryos - 45-70% conception

Other information:

We have had excellent results using adult cows as recipients - easy to manage and no additional shots if you're on a sync program plus results in better genetic gain versus heifer recipients.

Variable pricing on embryos and transfers depending on volume.

We can help set up your program and identify which animals to use for recipients and set up DC305 for recipient identification and lists.

We have personnel available to handle large flush, OPU, and transfer appointments in an efficient manner.
